TEAMS	18h30

FORMAL STATEMENT OF ACCEPTANCE

Hereby it is recorded that the project has been accepted and approved by the Product Owner Eng.Francisco Ramirez for which he concludes that the requested requirements have been met.

- User Authentication and Authorization: Users can log in to the system using valid credentials. The system ensures that users have specific roles (e.g., Project Manager, Procurement Member) and provides role-based access to different functionalities and screens. Unauthorized access to restricted screens or actions is denied.
- Role Management: Authorized users can create, update, and delete roles within the system, assigning specific permissions and access levels to different roles.
- Project Management: Users with the appropriate role can create, update, and manage projects. Each project can have associated budget items, which can be created and managed as well.
- Purchase Request Management: Users can create and manage purchase requests associated with specific projects. These requests can include detailed information such as items, quotations, and associated forms or invoices.
- Quotation and Invoice Management: Users can create, update, and delete quotations and invoices linked to purchase requests. These actions are restricted to users with the necessary permissions.
- Form and Item Request Management: Authorized users can create and manage forms and item requests associated with purchase requests. These forms include details such as tax ID, purchase URL, and bank certificates.
- View Purchase Requests: Project Managers and Procurement Members have specific views for displaying and managing purchase requests according to their roles.
